

# DASHBOARD IN A DAY

Spanish Point offer a Dashboard in a Day service that quickly and effectively allow you to start discovering business insights from your data right away.

# POWER BI DASHBOARD IN A DAY

Power BI is a cloud-based business analytics service that enables:

- fast and easy access to your data
- a live 360° view of your business
- data discovery and exploration
- insights from any device
- collaboration across your organization
- anyone to visualize and analyse data

Spanish Point offer a Dashboard in a Day service that quickly and effectively allow you to start discovering business insights from your data right away. The engagement is typically as follows:

- get connected to your data sources
- extract and transform your data
- model your data for analytics
- build a sample dashboard and/or reports
- show how to use the service for interacting with your data
- discuss the next steps and how best to proceed

Your BI consultant will apply best practices from Microsoft together with our own experience, and explain how the different items were created. The resulting model can be extended by you, or Spanish Point, to bring it into production. The time for this service varies depending on number and complexity of data sources you require to be used. Typically, it takes from 1 to 3 days. The actual building of dashboards and reports with users is within a day. We agree beforehand the scope and cost of the engagement.
