

# SMART Collaboration & Teamwork

Spanish Point design and build SMART Collaboration and Teamwork portals that enable organisations to create a sustainable workforce with high levels of talent retention and productivity.

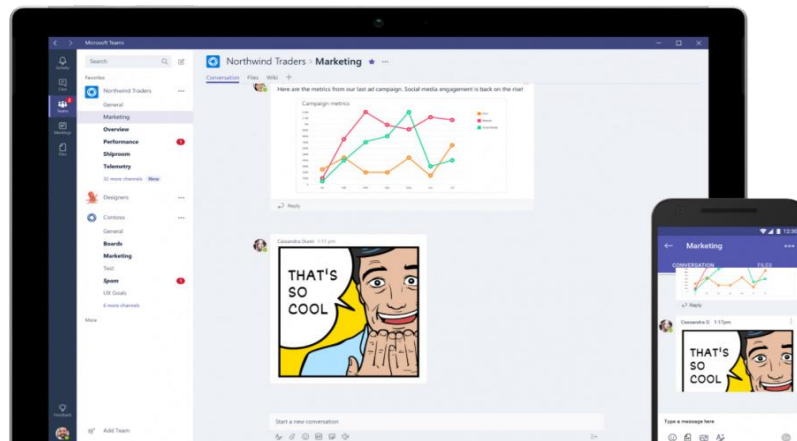

# SMART Collaboration & Teamwork

Spanish Point customers tell us that people are their most important asset. Our customers ask us to build corporate intranets and employee portals that allow their people to be able to collaborate and innovate seamlessly and securely from anywhere on any device.

Your business is a community. A community of people who work together to get things done. They need places where they can communicate, share, collaborate and be productive. They need this whether they are in the office, on the factory floor or on the move.

Spanish Point design and build SMART Collaboration and Teamwork portals that enable organisations to create a sustainable workforce with high levels of talent retention and productivity. They achieve this by empowering their employees.

Spanish Point has a proven Design Methodology that ensures a successful outcome. The methodology leverages Microsoft, global research and our own experience with customers across commercial and public sector organisations.

## Ready to Collaborate?

SMART Collaboration & Teamwork assessments for your organisation can be arranged by calling on 01 652 2000, or send an email to [sales@spanishpoint.ie](mailto:sales@spanishpoint.ie)
