

Document Management Solution

Keep all your important files in one secure and easily accessible location, saving you time and headaches.

Our Document Management System is a comprehensive suite of tools and technologies specifically designed to help organisations streamline and optimise their document management processes.

With core components such as SharePoint, OneDrive for Business, and Microsoft Teams, the system offers a centralised location for storing, organising, and sharing documents across the organisation. We understand that every organisation has unique needs and budget requirements. That's why our package offer is highly customisable to fit your specific requirements.

What's covered – Spanish Point DMS Approach

Discovery Workshop

A **free** one-day workshop with a Spanish Point senior practice lead. This will involve your key business and/or technology owners to discuss business needs and how to create an effective document management solution that fits your needs.

Agile Approach

An incremental or agile approach for the design and development of your employee experience platform solution.

Exploratory design work together with a demonstratable pilot solution, with then a series of follow-on defined work packages to meet agree business objectives and milestones.

Typical Price

€9,750

✓ Excluding VAT
